

	<b>Main Symposia Topic</b>	<b>Speakers</b>	<b>Individual Topics</b>
	<b>DAY 2</b>		
9:15-10:15	Primary progressive aphasia in the context of AD pathology Chair: Peter Nestor	Peter Nestor Glenda Halliday Murray Grossman	The spectrum of linguistic and imaging features in Alzheimer-related PPA Neuropathology of PPA and comparison to Alzheimer's disease Automated analyses of digitized speech in autopsy-confirmed PPA
10:15-10:35	Coffee break		
10:35-11:55	Dementia: Vision and beyond Chair: Lara Migliaccio	Lara Migliaccio Marion Houot  Rob McIntosh Keir Yong	Functional brain connectome in posterior cortical atrophy The A/T/N biomarkers scheme assessed in early-onset Alzheimer's disease spectrum  Visually-guided action in prodromal Alzheimer's disease Longitudinal neuropsychological and neuroanatomical changes in posterior cortical atrophy
11:55-12:15	Neurosciences and public policies  Chair:Loraine Obler	Facundo Manes	New concepts in the relationship between neurosciences and public policies
12:20-13:05	Lunch Chair: Masaru Mimura	Etsuro Mori	Symptomatology of dementia with Lewy bodies
13:15-14:35	PET studies Chair: Masaru Mimura	Harumasa Takano Daisuke Ito Masaru Mimura Keisuke Takahata	PET imaging of Alzheimer's disease PET imaging of non-Alzheimer neurodegenerative diseases PET imaging of late-life psychosis and mood disorder PET imaging of chronic traumatic encephalopathy
14:40-15:50	Poster & coffee break		
15.50-17:50	Loss of independence in dementias  Chair: Eneida Mioshi	Eneida Mioshi  Yong K  Backhouse T  O'Connor CM  Slachvesky A  Kondo M	Cognitive and environmental factors underpinning functional disability in dementia. Spatial orientation and balance disturbances in posterior cortical atrophy: implications for functional independence Experiences of managing functional disability in advanced dementia: difficulties with personal care. Maximising functioning in dementia: translating reablement research to dementia practice Challenge of evaluation of functional decline: from informant-based questionnaire to valuable functional decline. The ability of Alzheimer's disease patients to use electrical appliances and the usefulness of a remote-control task.
18:00-19:30	Noh Dancing
